

InterPlexus™

Flavo PlexC™

Vitamin C with Pure Flavonoids & Plant Extracts

A potent blend of vitamin C, plant extracts, and bioflavonoids to encourage a healthy immune response and improve antioxidant levels.*

- Vitamin C
- Hesperidin
- Hesperidin Methyl Chalcone (HMC)
- Ashwagandha Root Extract
- Grape Seed Extract
- Naringin

The immune system is constantly challenged through exposure to allergens, microbes, and other invaders. Normally the body is able to regulate its immune response; however in some situations the response may be sluggish or inappropriate and may require modulation.

How does Flavo PlexC™ work:

Flavo PlexC™ is formulated using vital nutrients and plant extracts to help modulate the immune response in conditions of increased oxidative stress like illness or chronic stress or in the face of allergies. Calcium ascorbate, which is a mineral salt of ascorbic acid, is used as the source of vitamin C. It is a less acidic or “buffered” form of vitamin C that also provides a small amount of calcium.

Supplementation with Flavo PlexC:

- Supplies antioxidants*
- Protects tissues from free radical damage during times of oxidative stress*
- Decreases histamine release and concentration*
- Helps stabilize blood vessel integrity and permeability*
- Stimulates immune system activity*
- Improves response to stress*

Dairy Free

Soy Free

FLAVO PLEXC™

MULTIVITAMINS & ANTIOXIDANTS

Flavo PlexC™

What the research and clinical use shows:

Vitamin C (as Calcium ascorbate)

Vitamin C is a versatile nutrient found mostly in plant foods, especially citrus fruits and leafy greens, as it provides resistance to the oxidative stresses created during photosynthesis. This essential water-soluble vitamin must be provided in the diet as humans (and a few other animals like guinea pigs and fruit bats) lack the enzyme to synthesize it. Vitamin C is required for the healthy structure and function of the body and vitamin C status may even be linked to rates of survival. Several large-scale prospective cohort studies have supported a correlation between vitamin C and a lower risk of mortality and cardiovascular diseases.^{1,2} Vitamin C is required in the formation of bones, muscles, and cartilage.³ Additionally, vitamin C is an important antioxidant, modulator of the immune system and is used to make neurotransmitters.³ It is considered an "immunostimulant" because it encourages immune cell activity against pathogens.³ Vitamin C also inhibits histamine secretion by mast cells and lowers blood histamine levels, thereby improving allergy symptoms.⁴

Flavonoids –

Hesperidin, Hesperidin Methyl Chalcone (HMC) & Naringin

Flavonoids (bioflavonoids) are polyphenolic plant chemicals found throughout the plant kingdom which provide a variety of physiological benefits.* It is believed that they work synergistically with vitamin C as antioxidants and anti-allergens. Hesperidin, hesperidin methyl chalcone and naringin are flavanones found in especially in citrus fruits.

Hesperidin has been shown to be beneficial to both the cardiovascular and neurological systems. In animal models, hesperidin use reduced the incidence of strokes and neurological diseases.⁵ Clinically, hesperidin was shown to reduce diastolic blood pressure after four weeks of supplementation.⁶ In a separate clinical trial of participants with metabolic syndrome, an improvement in endothelial function was seen following hesperidin administration, possibly due to an increase in nitric oxide production.⁷ In the same trial, hesperidin administration reduced circulating levels of inflammatory biomarkers and pro-atherogenic compounds.⁷

Hesperidin methyl chalcone (HMC) is a highly water-soluble form of hesperidin which exhibits positive effects on the circulatory system. In a clinical trial, HMC, when combined with a botanical extract of *Ruscus aculeatus* (common name Butcher's broom) and vitamin C was shown to improve the signs and symptoms of chronic venous insufficiency.⁸

Naringin is another powerful antioxidant and anti-inflammatory flavonoid of citrus fruits, especially grapefruit. Animal models have suggested naringin's potential benefit in treating obesity and metabolic syndrome.⁹ Multiple studies have demonstrated naringin's effects in decreasing circulating markers of inflammation and protection from oxidation.⁹

Ashwagandha (*Withania somnifera*) root extract 5% Withanolides

Ashwagandha, *Withania somnifera*, is an Ayurvedic herb used as an adaptogen, an antioxidant, and an anti-inflammatory which assists the body to perform its best in cases of acute and chronic stress.¹⁰ In-vitro studies have proven ashwagandha's activity against cancer cells.

Withanolides, one of the active constituents in ashwagandha extracts, are considered to be responsible for its adaptogenic and glucocorticoid-like effects.¹¹ Clinically, ashwagandha, administered with cow's milk, was shown to increase the activation of lymphocytes, thereby increasing immune system activity.¹⁰ As an

adaptogen, this herb has been shown to improve outcomes from perceived stress clinically.¹²

Grape Seed Extract (*Vitis vinifera*) 95% Proanthocyanidins

Red grape seed extract is rich in the flavonoid proanthocyanidin, which is an effective antioxidant, anti-inflammatory, and blood vessel stabilizer.¹³ In a study of 16 women, a standardized dose of grape seed extract was shown to decrease stasis edema in the lower legs after sitting for several hours.¹³

Supplement Facts

Serving Size: 2 Capsules

Servings per Container: 30

	Amount Per Serving	% DV
Vitamin C (as calcium ascorbate)	420 mg	700%
Calcium (as ascorbate)	52 mg	5%
Hesperidin (from <i>Citrus aurantium</i>) skin extract	300 mg	**
Hesperidin Methyl Chalcone (from <i>Citrus .spp</i>)	200 mg	**
Organic Ashwagandha (<i>Withania somnifera</i>) root extract 5% Withanolides	180 mg	**
Grape Seed Extract (<i>Vitis vinifera</i>) 95% Proanthocyanidins	100 mg	**
Naringin (from <i>Citrus paradisi</i>) fruit extract	100 mg	**

** Daily Value (DV) not established.

Other ingredients: Vegetarian capsule (HPMC, water), rice flour, calcium laurate.

Dairy, Soy, Egg & Gluten Free. Vegetarian. Non-GMO.

Suggested Use: Take 2 capsules daily before a meal or as directed by your physician.

Caution: If pregnant or nursing, consult your physician before using this or any other product.

Keep out of reach of children.

Store in a cool dry place.

Manufactured in the USA in a GMP compliant facility.
